

Trevor Mundel

 gatesfoundation.org/about/leadership/trevor-mundel

President, Global Health

Trevor Mundel leads the foundation's efforts to develop high-impact interventions against the leading causes of death and disability in developing countries. He manages the foundation's disease-specific R&D investments in HIV, Tuberculosis, Malaria, Pneumonia, Enteric and Diarrheal Diseases, and Neglected Tropical Diseases. He also manages cross-cutting product development programs, including Discovery & Translational Sciences, Innovative Technology Solutions, Integrated Development, and Vaccine Development & Surveillance. This work relies on close collaboration with an international network of grantees and partners.

Prior to joining the foundation in 2011, Trevor was global head of development with Novartis and previously was involved in clinical research at Pfizer and Parke-Davis.

Born and raised in South Africa, Trevor earned his bachelor's and medical degrees from the University of the Witwatersrand in Johannesburg. He also studied mathematics, logic, and philosophy as a Rhodes Scholar at Oxford University, and he earned a Ph.D. in mathematics at the University of Chicago.
